IMPROVE YOUR CYBERSECURITY

REVAK
SECURITY AND INTELLIGENCE SERVICES

DEVICES

1. Know all the devices you have connecting to the internet
2. Ensure devices are updated and using the latest software
3. Change the default password for all devices
4. Ensure all devices have anti-virus installed

** PASSWORDS **

- Have a separate and unique password for each email account
- Use a password manager to store passwords (lastpass.com)
- Use Two Factor Authentication where possible

Have your email accounts been compromised? Check using haveibeenpwned.com and then change any compromised passwords

ON THE GO >>>

Disable Bluetooth unless using it

Avoid public WiFi, especially for transactions or logging into emails

https:// ONLINE

Pay online with a card not linked to your main bank account

Review your public information on social media sites

Avoid clicking links in emails unless you know where they're from

Turn on your privacy settings

Remove anything you don't want to share with strangers
